- **1 in 4** 14-25 y/o use nicotine products
- **85%** of smokers start as minors

NicSafe with mandatory ID-check before ***every*** purchase

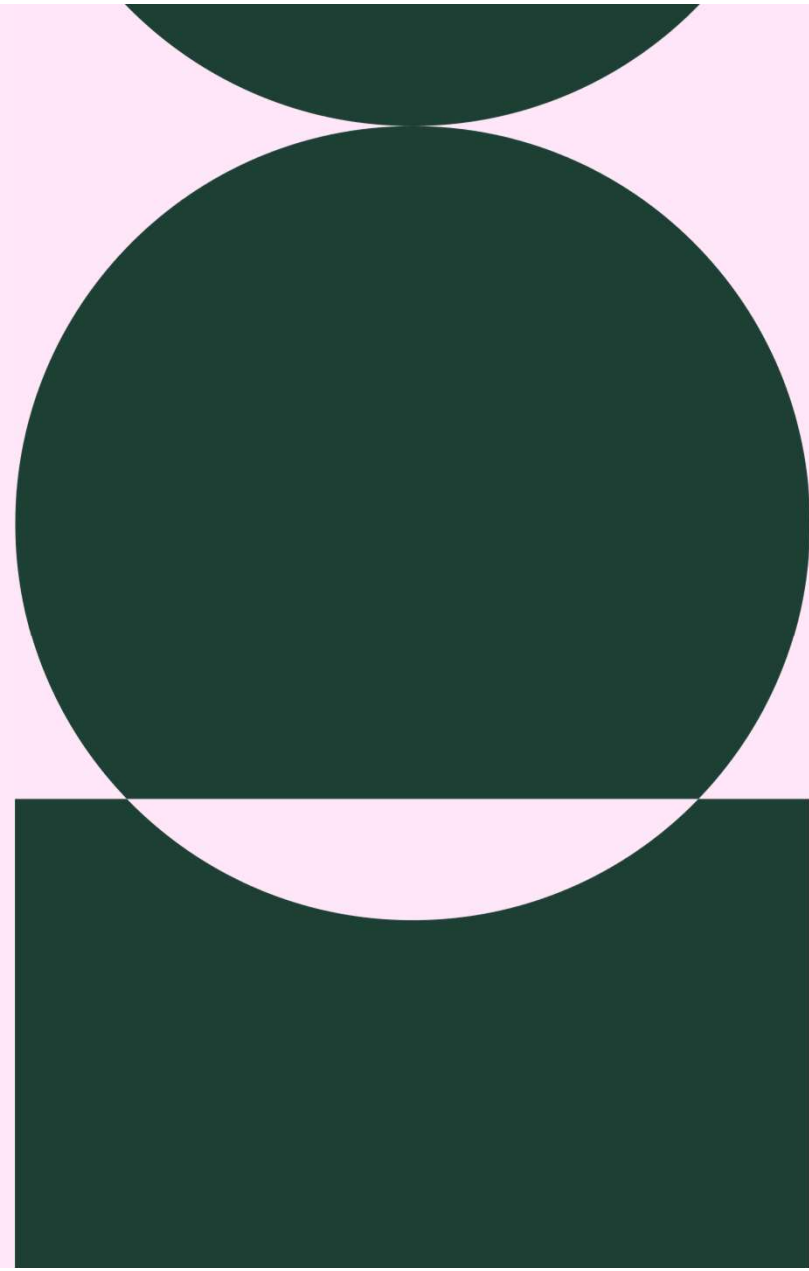

- ⊕ Mit  authentication every time
- ⊕ Costs less than **50,000kr**
- ⊕ Designed to fit in **every** store

No cashier judgment calls.

No fake IDs.

No liability for store owners.

Absolute compliance, every single purchase.

An abstract graphic on the left side of the slide. It features a large dark green circle in the center. Above it is a smaller dark green semi-circle. Below it is a dark green rectangle. The background of the slide is a light pink color.

Product Demo

- 1 Scan ID
- 2 MitID Verification
- 3 Choose Product
- 4 Pay and Receive

Go-to-Market

1

Legal requirement for nicotine sales, government funding, pass legislation and work with suppliers.

2

Create market demand. The investment can pay for itself before it incurs 2 fines. Businesses can secure themselves.

THANK YOU!

Help us in preventing
the future
generation
from
becoming addicts!

Backup

No MitID, No Problem

Tourists will get a temporary MitID and use NicSafe with their passport.

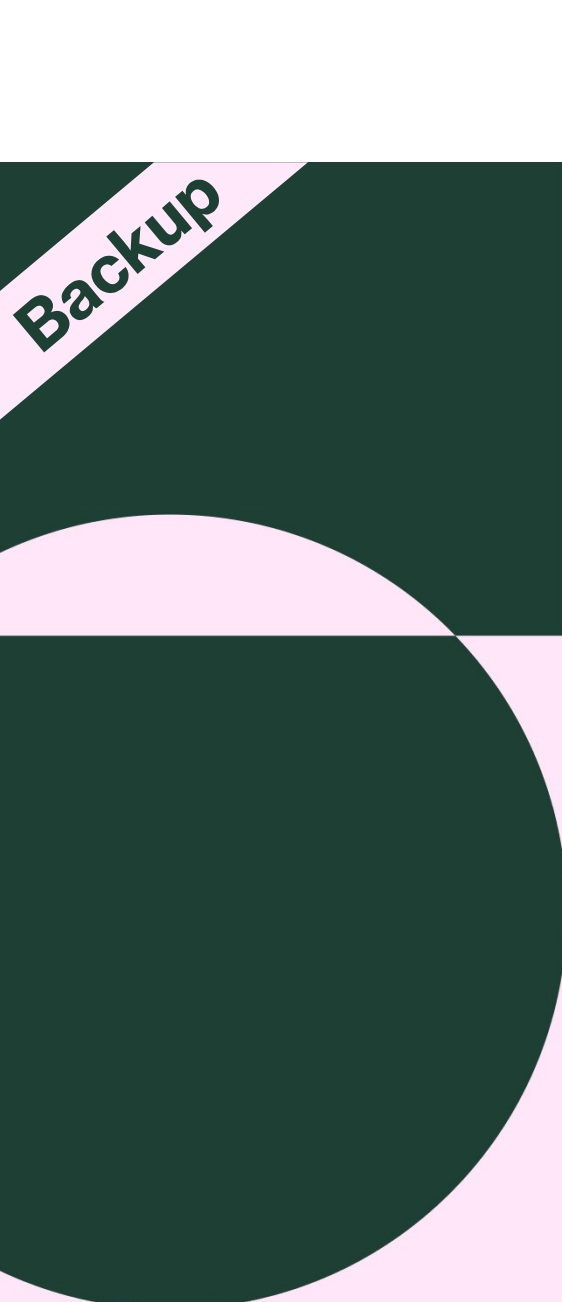

People exempt from MitID can apply for a physical card to ensure safe identification.

Backup

Data Security

- End-to-End Encryption**
- GDPR compliant**
- Complete anonymity guaranteed**
- Government-grade security**

Backup

Public Pushback

- System collects less data than a cashier looking at ID
- No facial recognition or tracking
- No uncomfortable interactions asking for ID
- MitID is already required for online purchases

Future Prospects

1

Support for quitting with doctor-approved limits on weekly purchases.
(A ROFUS-like registration system).

2

Possibility for ***Skattestyrelsen*** to better track nicotine product sales.

Business Model

1

Owning. Store owner buy NicSafe and are responsible for maintenance and other services.

2

Leasing. We own the machine making maintenance our responsibility. The customer pays a monthly fee.
